..AND HIGHLAND NEIGHBOURS

Dear Mr Ray,

I/We formally object to the Beaully to Denny powerline development and demand a Public Inquiry for the following reasons:

- **The cumulative, negative impact of so many lines and pylons in one area**
- **Potential health risk - especially to young children**
- **Unacceptable threat to property values**
- **Unacceptable effect on protected wildlife and their habitat**
- **Adverse effect on tourism, landscape and recreation**
- **Failure by the developer to fully investigate advanced techniques for burying powerlines**
- **The area will pay an unacceptable social and economic price for supplying power to Central Scotland and England**
- **The proposed and future powerlines must be buried as they pass through our communities, into and out of Balblair sub-station**

Use this space to add your own reason - and lend weight to this objection
